

MD. ABU SAEED

Junior Next.js Developer

abusaieed0@gmail.com | +8801719036590 | Dhaka, Bangladesh | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Full-stack MERN developer skilled in React, Next.js, Node.js, and MongoDB, with a strong passion for crafting responsive, high-performance web applications. Committed to writing clean, scalable code and delivering seamless user experiences that drive real impact. Eager to contribute to a collaborative team while growing professionally.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js

Backend: Node.js, Express.js, MongoDB

Tools: Git & GitHub, RESTful API design, Figma

INTERPERSONAL SKILL

Problem-Solving — Skilled at debugging, architecting solutions, and thinking critically under pressure.

Attention to Detail — Focused on clean code and pixel-perfect UIs that signal professionalism.

Communication — Able to articulate technical ideas clearly to both technical and non-technical stakeholders.

Adaptability — Eager to learn new tools and frameworks as the tech landscape evolves.

Team Collaboration — Experienced working in Agile-style environments, supporting peers and contributing to code reviews.

PROJECTS

MediQueue — A full-stack tutor booking platform that connects students with verified, subject-specific tutors across Bangladesh for seamless session scheduling online or in person.

Tech Stack: Next.js 14, Tailwind CSS, Node.js, Express.js, MongoDB.

- Students can search tutors by name or subject with case-insensitive filtering and narrow results by session availability date range to find the right match instantly.
- Real-time booking system with automatic slot management that prevents overbooking, blocks unavailable dates, and instantly updates remaining slots after each confirmed booking.
- Tutors can create and manage profiles with subject specialisation, availability schedule, teaching mode, and session fees, with instant UI updates on edits or deletions.
- Students get a dedicated dashboard to view their full booking history, cancel sessions at any time, and have automatic slot restoration upon cancellation.

[GitHub \(Client Side\)](#) | [GitHub \(Server Side\)](#) | [Live Lin](#)

Tiles-Gallery — A tile browsing and showcase platform with dynamic listings and responsive design.

Tech Stack: Next.js 15, Tailwind CSS, MongoDB, Node.js, Express.js.

- Developed a full-stack tile-browsing gallery application with dynamic product listings, category filtering, and a responsive UI optimised for all screen sizes. Integrated Better-Auth to manage secure user authentication for the platform.
- Implemented a RESTful backend with Express.js and MongoDB for efficient data storage and retrieval of tile products.
- Utilised Next.js server-side rendering (SSR) and static generation for fast page loads and improved SEO performance.
